## Optional Equipment – Carrera GT

The following is a list of optional equipment numbers for Carrera GT models. Since 1982, option numbers have been included on vehicle identification labels. Some M numbers are considered standard in the USA and as such will not be shown as optional equipment on the vehicle records. Refer to appropriate order guide for list of standard equipment. Some numbers denote more than one option depending on model and/or year. In some cases several options are grouped together and sold as a package. The packages can also be found in the order guide. Order guides are supplied to your Parts Department by our Sales Department.
